

Product Description

Tremco® 2450 Protection Board is an extruded, hollow-core polypropylene/polyethylene copolymer. The board is grey in color with a standard thickness of 0.08" (2.2 mm).

Basic Uses

Tremco 2450 provides protection for most commonly used waterproofing membranes, both during and after construction. Typical applications include plaza decks, roof terraces, landscaped decks, planters and foundation walls.

Features and Benefits

- Provides protection from normal construction traffic for most waterproofing membranes. Its light weight provides economic advantages in both application and on-site handling.
- Easily cut or folded to conform to difficult site conditions. Positive adhesion to membranes makes it ideal for vertical applications such as planters and foundation walls.
- Tremco 2450 remains inert in landscaped areas and will not absorb moisture, thus providing long-term protection to the waterproofing membrane.

Packaging

Sheets are 0.08" (2.2 mm) thick, 4' x 3' (1.2 m x 0.9 m)

Fifty sheets = 600 ft² (55.7 m²) per bundle

Limitations

- Not intended for use directly under asphalt paving.
- Not recommended for permanent UV exposure.

Warranty

Tremco warrants its Products to be free of defects in materials, but makes no warranty as to appearance or color. Since methods of application and on-site conditions are beyond our control and can affect performance, Tremco makes no other warranty, expressed or implied, including warranties of MERCHANTABILITY and FITNESS FOR A PARTICULAR PURPOSE, with respect to Tremco Products. Tremco's sole obligation shall be, at its option, to replace or to refund the purchase price of the quantity of Tremco Product proven to be defective, and Tremco shall not be liable for any loss or damage.
